GOING BEYOND LUSTRE AND UNIQUENESS...

Drawing inspiration from Sri Lanka's diversity in beauty; FACETS 2023 builds on its reputation as a premier Gem and Jewellery exhibition in the Asian region, with a modern outlook.

Some of the world's finest and most attractive coloured stones are found within our island paradise. Their rare nature and distinctive qualities are reflected in the amazing natural and cultural diversity the country holds. It is this link between gem and geography; that enables us to elaborate the value presented through FACETS as being unique. The new millennium, the love for our precious stones has only increased with the arrival of a new generation of consumers. Their preference towards authenticity and exclusivity, will only contribute to further industry growth.

Supported by both state and private bodies; the 30th edition of this much anticipated gem and jewellery show presenting collections from around the world. FACETS 2023 promises to be a revolutionizing revival; driving the passion for coloured gemstones and gem-studded jewellery into a glittering future.
